**Force a specific default lock screen and logon image**

Force a specific default lock screen and logon image Previous Setting Next Setting

☐ Not Configured    Comment:   
☒ Enabled   
☐ Disabled

Supported on: At least Windows Server 2012, Windows 8 or Windows RT

Options: Help:

Path to lock screen image:

Example: Using a local path:   
 C:\windows\web\screen\lockscreen.jpg

Example: Using a UNC path:   
 \\Server\Share\Corp.jpg

This setting allows you to force a specific default lock screen and logon image by entering the path (location) of the image file. The same image will be used for both the lock and logon screens.

This setting lets you specify the default lock screen and logon image shown when no user is signed in, and also sets the specified image as the default for all users (it replaces the inbox default image).

7. Link the USER\_GPO\_POST\_WALLPAPER to MKT\_JKA>USERS>P\_POSTM Organization Unit.
