	<i>Server Performance Report</i>	

3.0 ANALYSIS AND RECOMMENDATIONS

Unplanned Power Outage on July 6, Saturday. All servers in the Mia Khalifa rack went down for about 15 minutes as reported.

3.1 JKA-VWIN-DC01

- No issue reported on the server.
- The gap on the graph on July 6 was due to the unplanned power outage in JAKA Site.

3.2 JKA-VLIN-FNP01

- No issues reported on the server.
- The gap on the graph on July 6 was due to the unplanned power outage in JAKA Site.
- The spikes on the CPU graphs were due to files being uploaded and updated by Ops and Back-office on a regular basis.

3.3 JKA-VWIN-WSUS01

- No issues reported on the server.
- The gap on the graph on July 6 was due to the unplanned power outage in JAKA Site.
- The minor spikes on the server's CPUs were due to updates being downloaded from Microsoft Update, and synchronized to domain PCs on schedule.

3.4 JKA-VLIN-FIM01

- No issues reported on the server.
- The gap on the graph on July 6 was due to the unplanned power outage in JAKA Site.
- The activity on the CU graphs were due to the regular logging of server and firewall equipment for security and event monitoring.

3.5 JKA-PESX-HV01

- No issues reported on the server.

3.6 APOLLO

- No issues reported on the server.
- The gap on the graph on July 6 was due to the unplanned power outage in JAKA Site.
- The spikes on the server's CPU graphs were due to logs being downloaded by the server from all Biometric Devices in all OAM sites every 2 hours.

3.7 KAIROS

- No issues reported on the server.

3.8 KALLIOPE

- No issues reported on the server.
- The gap on the graph on July 6 was due to the unplanned power outage in JAKA Site.

3.9 MARKETING

- No issues reported on the server.

Process Owner: IT Department	REPORT	R-SVR-5.1
	<i>Server Performance Report</i>	

- The spikes on the server's CPUs were due to files being uploaded and updated by the Marketing Team.

3.10 OSTICKET

- No issues reported on the server.
- There are several automated tickets scheduled to generate every day at 7AM and 9PM, and weekly at 12AM.

3.11 PELOPS

- No issues reported on the server.
- The gap on the graph on July 6 was due to the unplanned power outage in JAKA Site.
- The huge gap on the graph was due to the SNMP service that did not start right away upon boot during the unplanned power outage on Saturday, and planned power outage on Sunday.

3.12 QUICKBOOKS

- No issues reported on the server.

3.13 ZEPHYRUS

- No issues reported on the server.

3.14 BATANGAS

- No issues reported on the server.

3.15 BORACAY

- No issues reported on the server.
- The usual spikes on the server's CPUs were due to calls coming in for Cebu Pacific. MP3 recordings are being saved as well.

3.16 CORON

- No issues reported on the server.

3.17 PAMPANGA

- No issues reported on the server.
- The spikes every 4AM were due to MP3 files being deleted to maximize disk space. The only files being deleted are those MP3 files older than 90 days.

3.18 RIZAL

- No issues reported on the server.
- This server is used mostly for productivity monitoring, causing the spikes on the graph and the RAM to max out.
